M.Sc. Engineering Physics graduate from Lund University (LTH), specializing in AI, control systems, and robotics. Completed a master's thesis in the Control Engineering robotics lab on reinforcement-learning-based control for a robot dog. Strong profile in Python/C++, robotics simulation, machine learning, system integration, technical problem solving, and sim-to-real evaluation. Particularly interested in roles within robotics, autonomy, embedded/software engineering, simulation, test/verification, and applied AI.

Education

2019 – 2026

Master degree in Engineering Physics / LTH

I recently completed my master's thesis in robotics at the Control Engineering department, where I utilized reinforcement learning to develop control policies for a Robot dog. Through my Engineering Physics studies, I have developed a strong foundation in mathematics and physics combined with applied work in AI and robotics, along with the ability to quickly ramp up in new systems. I have experience across Python, C++, C#, and Java, and I'm particularly motivated by roles where I can develop learning-based and system-level solutions that create real-world impact.

Recent Work Experience

Robotics Engineer/ LTH RobotLab X Ericsson 2026 SEP – 2026 OKT

Participated in a collaborative project between Ericsson and LTH RobotLab to develop a Tic-Tac-Toe-playing UR5e robot for demonstrating Ericsson's network at WaraOps Industry Day. Primarily responsible for MQTT-based protocol design, including command validation, status reporting and fault handling, as well as calibrated robot motion and game-piece state tracking. Also contributed to a RealSense-based board-perception prototype and WebRTC camera streaming for the live demonstration.

Technical Service consultant/ Tetra Pak, Lund 2023 – 2026

During the last four summers I have worked at Tetra Paks outbound technical service team as an order picker for their Miniload system. This work requires a great attention to detail and an ability to adhere to protocol to ensure the highest possible quality.
